Private Antitrust Litigation
New Evidence, New Learning
*edited by Lawrence J. White*

Is private antitrust litigation out of control, encouraging frivolous suits and deterring companies from pursuing innovative manufacturing, organization, and distributional techniques? Or is it a fair and useful system, particularly during periods when government antitrust enforcement is lax and pro-business? Using a unique collection of data on more than 2,350 antitrust cases filed in five districts between 1973 and 1983, prominent scholars analyze the key issues involved in reform proposals. $40.00

Deregulation and the Future of Intercity Passenger Travel
*John R. Meyer and Clinton V. Oster, Jr.*
with John S. Strong, José A. Gómez-Ibáñez, Don H. Pickrell, Marni Clippinger, and Ivor P. Morgan

*Deregulation and the Future of Intercity Travel* surveys the latest changes in the turbulent area of airline deregulation. This well-written analysis of the evolution of airline regulation deals with such current trends and topics as the proliferation of mergers and takeovers and the strategies and tactics involved in price wars and other marketing ventures. The authors extend their study to include all the major systems of intercity passenger travel—automobiles, buses, trains, airplanes—from the point of view of their interdependency. $27.50

The Dilemma of Toxic Substance Regulation
How Overregulation Causes Underregulation
*John M. Mendeloff*

In this provocative study, John Mendeloff shows that federal programs such as OSHA, which set standards for toxic substances have twin dilemmas. The new standards they establish are usually too strict and costly to justify the benefits they confer. But at the same time, the slow pace of standard-setting means that many serious hazards are never addressed at all. Mendeloff argues that more extensive, but less strict, rulemaking could make both industry and workers better off and that changes in legislation are required to break the current stalemate. $35.00

*Regulation of Economic Activity Series*
