The Cost of Capital
Estimating the Rate of Return for Public Utilities
A. Lawrence Kolbe and James Read, with George R. Hall
This book evaluates the five major estimation methods used to estimate the required rate of return to investors, providing a systematic assessment of the strengths of each and surveying new methods as well. It is a thorough review and critique that will prove valuable to all members of the regulatory community.

Markets for Power
An Analysis of Electric Utility Deregulation
Paul L. Joskow and Richard Schmalensee
"Markets for Power joins economic theory with a deep knowledge of the institutional features of the electric generation industry to produce a major public policy statement...it should be carefully read by all who have an interest in deregulation in the electric generation industry and should serve as a model for subsequent research on related comparative economic issues by academics and public policy analysts alike."
—Oliver E. Williamson, Yale University.
